## Introduction

The 8.0.2 release of the PowerSchool Student Information System (SIS) includes enhancements and resolutions to previously identified issues.

## Installation Notes

You must be running PowerSchool 7.8.x or greater in order to upgrade to PowerSchool 8.0.2.

The installer setup files for this release are available for download from [PowerSource](#).

If you are upgrading from PowerSchool 8.0.1 or 8.0.1.1 you will need:

**Note:** Installer changes necessary in this release affect Texas customers and does not require a Database Scripts Updater.

- PowerSchool 8.0.2 Application Installer

If you are upgrading from PowerSchool 8.0 you will need:

- PowerSchool Database Scripts Updater 12.1 ([PowerSource](#) > [Downloads](#) > [PowerSchool Database](#) > [PowerSchool Database 12.1](#))
- PowerSchool 8.0.2 Application Installer

If you are upgrading from PowerSchool 7.8.x – 7.11.x you will need:

- PowerSchool Database 12.1 Installer ([PowerSource](#) > [Downloads](#) > [PowerSchool Database](#) > [PowerSchool Database 12.1](#))
- PowerSchool 8.0.2 Application Installer

If you are upgrading from PowerSchool 7.0.x through 7.7.x you will need:

- PowerSchool Database Scripts Updater 11.2 ([PowerSource](#) > [Downloads](#) > [PowerSchool Database](#) > [PowerSchool Database 11.2](#))
- PowerSchool 7.8.0.0 Application Installer
- Once upgraded to PowerSchool 7.8, download and install the Database 12.1 Installer and the 8.0.2 Application Installer.

If you are performing a new installation, you will need:

- PowerSchool Database 12.1 Installer (**PowerSource > Downloads > PowerSchool Database > PowerSchool Database 12.1**)
- PowerSchool 8.0.2 Application Installer

**Note:** PowerSchool 8.0.2 does not support upgrading from PowerSchool 6.x. If your district is using PowerSchool 6.x, you must upgrade to PowerSchool 7.0 - 7.8 before upgrading to PowerSchool 8.0.2. For more information, see the *Installation Guide for PowerSchool 8.x* available on [PowerSource](#).

**Note:** If Schools Interoperability Framework (SIF) is enabled on your system, an update to the latest SIF adapter is required. Consult the latest SIF documentation for information on updating to the latest SIF version.

The PowerSchool Application Installer is available at **Support > Downloads > PowerSchool > PowerSchool Installers > PowerSchool 8.0.2 > PowerSchool Application [version] installer**.

The PowerSchool Database Installer is available at **Support > Downloads > PowerSchool > PowerSchool Database > PowerSchool Database 12.1 > PowerSchool Database [version]**.

Use the PowerSchool installer to manage your PowerSchool deployment. It installs the database and application for a specific server, and it configures per-server settings such as database and web server ports, passwords, and file paths.

## PowerSchool System Requirements

If this is the first time you are installing PowerSchool, review the *PowerSchool 8.x Hardware and Software Requirements* and the *Installation Guide for PowerSchool 8.x*, available on [PowerSource](#), before installing this version of PowerSchool.

The *Hardware and Software Requirements* are updated periodically, and contain information on supported software and browser versions for a release. Review this document before installing updates to PowerSchool.

## General Recommendation

Pearson strongly recommends that you check to make sure Secure Sockets Layer (SSL) is enabled on your PowerSchool server to ensure all data passed between your server and end users/Pearson Technical Support remains secure and private. If SSL is not enabled, data moving between your server and end users is unencrypted. For more information on implementing SSL, see [Knowledgebase article 8476](#) available on PowerSource.

## PowerSchool Components

PowerSchool is comprised of several software components, each versioned independently from one another. This allows for greater flexibility of component updates as new features and bug fixes become available. Some updates may include dependencies between components. These dependencies will be communicated and built in to the component update installers to prevent PowerSchool from being configured incorrectly.

The following table identifies the version number for each PowerSchool component for this release:

Component	Version Number
API Documentation	1.4.0
PowerSchool Server	8.0.2
PowerTeacher	2.8.0.1
ReportWorks	1.5.1.10
PowerScheduler	3.0.2
Oracle	12c
Schoolnet	16.0
State Reporting	14.8.3
Report SDK	1.13.2
Java	1.7

# Documentation

Be sure to check out the updated online help. Assistance is just a click away!

## Resolved Issues

### General Fixes

Issue	Description
Custom Field Data Migration Error	When migrating user created custom fields, an error appears stating that the retrieval of the primary key for the core table has failed. This issue is now resolved.
Digital Signing of Installers Compatibility	Implemented v2 digital signatures for Mac installers for PowerTeacher Gradebook and ReportWorks. Mac OSX 10.9.5 (Mavericks) will only accept v2 digital signatures. Digital signatures for PowerScheduler will be updated to v2 in a later release this year.
Incident Management Error	When attempting to access some incidents on the Incident List, an error message appears and the record does not display. This issue is now resolved.
Language Translation Error When Single Quote is Used	After translating text using the Localization feature, a single quotation mark within the translated text caused an error and a blank page would display when signing in to PowerSchool. This issue is now resolved.
Lead Teacher Change Results in SQL Error	When adding a Lead Teacher to a section, an error appears stating "ORA-00933: SQL Command not properly ended". This issue is now resolved.
Mobile Apps Unable to Connect to PowerSchool	Mobile app users are unable to connect to the district PowerSchool server due to a log error. This issue is now resolved.
Student Numbers Incorrect on End of Year Validation	When an error occurs on the End-of-Year Validation for a student, the student number is incorrect. This issue is now resolved.
Sync Failures Cause Server to Run Out of Disk Space	If there are issues with CC records that cause DALX-Milan Atomic Sync Failures, the Task Master – Nightly Realign Section Schedules process runs for an extended period of time which results in ARCHIVELOGS buildup that causes PowerSchool to shut down. Turning Atomic Sync off during the Schedule Commit can cause these errors. The Schedule Commit process has been updated to prevent these bad records from being copied to the live side.
Taking Attendance as Substitute Teacher	When taking single day attendance in PowerTeacher as a substitute, selecting an attendance code and clicking a student did not populate the selected attendance code for the student. This

Issue	Description
Does Not Save	issue is now resolved.
Translated Field Names Do Not Work with Student List Options	When using the Student list options, translated field names do not work. This issue is now resolved.

## State and Provincial Reporting

### Arizona State Reporting Updates

PowerSchool 8.0.2 includes Arizona state-specific updates. For more information, see Arizona state-specific release notes available on [PowerSource](#).

### Tennessee State Reporting Updates

PowerSchool 8.0.2 includes Tennessee state-specific updates. For more information, see Tennessee state-specific release notes available on [PowerSource](#).

## Known Issues

The following new known issue was introduced with this release:

During startup of PowerSource/Mobile registration, PowerSchool is unable to successfully complete the process and the environment is not registered. Error messages appear within the PSJ-runtime log at the time of the registration attempt.

- **Workaround:** Go to `admin/district/district-registration.html` and submit the page to complete the registration.

This issue is referenced in [Knowledgebase article 72862](#) available on PowerSource.

# Page and File Changes

The following is a list of web\_root file changes. If you manage your own customized built-in PowerSchool files, review the list for new, updated, and deleted files. If you use an image server and there were changes in the web\_root/images or web\_root/scripts directories, be sure to update these directories on your image server.

**Note:** Starting with PowerSchool 8.0.2, this list now includes all files that changed under web\_root. This change was made in response to requests from our customers.
