## Resolved Issues

### PowerSchool Not Responding to Mobile Service Requests

A library file is causing PowerSchool to not respond to mobile service requests. This blocked all mobile apps (PowerSchool for Parents, PowerSchool for Students, and PowerTeacher Mobile) from connecting to PowerSchool. The file is now removed and this issue is now resolved. For more information, see [Knowledgebase article 72755](#).

## PowerTeacher Gradebook Stand Alone App Does Not Launch When Certificate is Renewed

After renewing the server SSL certificate, PowerTeacher Gradebook Stand Alone App and PowerTeacher Administrator no longer launch. If you are using any of the following certificates for SSL in PowerSchool, you must upgrade to 8.0.1.1:

- Starfield Root Certificate Authority - G2
- Go Daddy Root Certificate Authority - G2
- SecureTrust CA (Trustwave)
