## Introduction

The 8.1 release of the PowerSchool Student Information System (SIS) includes enhancements and resolutions to previously identified issues.

## Installation Notes

You must be running PowerSchool 7.8.x or greater in order to upgrade to PowerSchool 8.1.

The installer setup files for this release are available for download from [PowerSource](#).

If you are upgrading from PowerSchool 8.0 – 8.0.2 you will need:

- PowerSchool Database Scripts Updater 12.1 ([PowerSource](#) > [Downloads](#) > [PowerSchool Database](#) > [PowerSchool Database 12.1](#))
- PowerSchool 8.1 Application Installer

If you are upgrading from PowerSchool 7.8.x – 7.11.x you will need:

- PowerSchool Database 12.1 Installer ([PowerSource](#) > [Downloads](#) > [PowerSchool Database](#) > [PowerSchool Database 12.1](#))
- PowerSchool 8.1 Application Installer

If you are upgrading from PowerSchool 7.0.x through 7.7.x you will need:

- PowerSchool Database Scripts Updater 11.2 ([PowerSource](#) > [Downloads](#) > [PowerSchool Database](#) > [PowerSchool Database 11.2](#))
- PowerSchool 7.8.0.0 Application Installer
- Once upgraded to PowerSchool 7.8, download and install the Database 12.1 Installer and the 8.1 Application Installer.

If you are performing a new installation, you will need:

- PowerSchool Database 12.1 Installer ([PowerSource](#) > [Downloads](#) > [PowerSchool Database](#) > [PowerSchool Database 12.1](#))
- PowerSchool 8.1 Application Installer

**Note:** PowerSchool 8.1 does not support upgrading from PowerSchool 6.x. If your district is using PowerSchool 6.x, you must upgrade to PowerSchool 7.0 - 7.8 before upgrading to PowerSchool 8.1. For more information, see the *Installation Guide for PowerSchool 8.x* available on [PowerSource](#).

**Note:** If Schools Interoperability Framework (SIF) is enabled on your system, an update to the latest SIF adapter is required. Consult the latest SIF documentation for information on updating to the latest SIF version.

The PowerSchool Application Installer is available at **Support > Downloads > PowerSchool > PowerSchool Installers > PowerSchool 8.1 > PowerSchool Application [version] installer**.

The PowerSchool Database Installer is available at **Support > Downloads > PowerSchool > PowerSchool Database > PowerSchool Database 12.1 > PowerSchool Database [version]**.

Use the PowerSchool installer to manage your PowerSchool deployment. It installs the database and application for a specific server, and it configures per-server settings such as database and web server ports, passwords, and file paths.

## PowerSchool System Requirements

If this is the first time you are installing PowerSchool, review the *PowerSchool 8.x Hardware and Software Requirements* and the *Installation Guide for PowerSchool 8.x*, available on [PowerSource](#), before installing this version of PowerSchool.

The *Hardware and Software Requirements* are updated periodically, and contain information on supported software and browser versions for a release. Review this document before installing updates to PowerSchool.

## General Recommendation

Pearson strongly recommends that you check to make sure Secure Sockets Layer (SSL) is enabled on your PowerSchool server to ensure all data passed between your server and end users/Pearson Technical Support remains secure and private. If SSL is not enabled, data moving between your server and end users is unencrypted. For more information on implementing SSL, see [Knowledgebase article 8476](#) available on PowerSource.

## PowerSchool Components

PowerSchool is comprised of several software components, each versioned independently from one another. This allows for greater flexibility of component updates as new features and bug fixes become available. Some updates may include dependencies between components. These dependencies will be communicated and built in to the component update installers to prevent PowerSchool from being configured incorrectly.

The following table identifies the version number for each PowerSchool component for this release:

Component	Version Number
API Documentation	1.5.0
PowerSchool Server	8.1
PowerTeacher	2.8.0.1
ReportWorks	1.5.1.11
PowerScheduler	3.0.2
Oracle	12c
Schoolnet	16.1
State Reporting	14.9.4
Report SDK	1.14.0.0
Java	1.7

## What's New in PowerSchool 8.1

PowerSchool 8.1 includes improved efficiencies that significantly extend the functionality of many of the latest features in PowerSchool. Enhancements to API, Document Attachments, and field level security are intended to save you time and resources.

With improved API functionality, access to PowerSchool data from third-party applications streamlines critical processes that require grading categories, demographic, lunch and attendance data. Document attachment enhancements include improvements to search and security as well as the capability to download multiple attachments in a zipped file. Field Level Security is now enforced in the PowerTeacher portal, and all extended schema is enforceable.

### Key Features and Enhancements

- District-managed controls to allow third parties to pull additional data through the PowerSchool API.
- Document Attachments improvements allow for more efficient search and download.
- Field Level Security has been extended to many more PowerSchool pages and fields.

## PowerSchool API

The enhanced functionality provided in this release includes:

Feature	Description
Enable Direct Database Access	PowerSchool Administrators can now control the level of database access a plug-in can obtain via the PowerSchool API. Only plug-ins enabled for direct database access can access new direct table API calls such as Get Student Attendance.
Get Grade Scales And Grading (Assignment) Categories	Third-party applications are now able to obtain grade scales and grading (assignment) categories from PowerSchool.
Get Staff Demographic Data	Third-party applications are now able to obtain staff demographic data from PowerSchool.
Get Student Attendance Data	Third-party applications are now able to obtain student attendance data from PowerSchool.
Get Student Lunch Status, Balance And Fee Status	Third-party applications are now able to obtain student lunch status, lunch balance and fee status from PowerSchool.
Get Student's Associated Parent/Guardian Data	Third-party applications are now able to obtain a student's or list of students' associated parent/guardian data from PowerSchool.
Increased Page Size For API Calls	The maximum number of records returned per API call can now be set as high as 1,000. The default page size remains at 100 records.

## Document Attachments

The enhanced functionality provided in this release includes:

Feature	Description
Document Attachment Categories	Attachments can now be categorized as part of the Document Attachments feature. Any number of categories can be applied to documents for organization, searching, and defining the default

Feature	Description
	security level.
Document Attachment Security	Security can be fine-tuned through the use of categories and user roles to determine whether you are able to download, edit, or delete a particular attachment.
Download Multiple Attachments At Once	Any selection of documents can be downloaded into a compressed .zip file using one action.
Enhanced Document Attachment Filter	The Document Attachments filter has been greatly enhanced to allow for precise search results. Any combination of categories, users, file sizes, dates, and more, can be used as filter criteria to identify the exact set of documents you want to work with. You can immediately jump to any page in the results or set the number of rows you want to see per page.
Report On Document Attachment Size	The Document Attachment filter now shows the size of all documents in the search results. This can be used to identify how much space is being used by a particular school, category, user, student, or the entire district.

### Field Level Security

The enhanced functionality provided in this release includes:

Feature	Description
Additional PowerSchool Pages And Fields Now Feature Field Level Security	<p>The following PowerSchool pages and fields now feature Field Level Security:</p> <ul style="list-style-type: none"> <li>• Transfer Info Page</li> <li>• Staff Information and Security</li> <li>• Student and Staff Search</li> <li>• Federal Race</li> <li>• Student Access Accounts</li> <li>• Data Export Manager</li> <li>• Staff/Student Field Value</li> <li>• DDA/DDE</li> <li>• Co-Teaching</li> <li>• School Information</li> </ul> <p>See <a href="#">Knowledgebase article 72328 on PowerSource</a> for a complete list of all fields securable</p>

Feature	Description
	through Field Level Security.
All Extended Schema Enforceable Through Field Level Security	All database extension fields can be secured through Field Level Security, including direct table extensions, child tables and stand-alone tables.
Field Level Security Enforced In Teacher Portal	Field Level Security is now enforced in the PowerTeacher portal.

### PowerSchool Enhancements

The enhanced functionality provided in this release includes:

Feature	Description
Health Screening Entry for Groups of Students	Using the Health Screenings group function, you can view health screening information for a selected group of students for a selected date and screening type. Additionally, you can set default screening values for particular screening types and apply them to the selected group of students, as needed.

## Resolved Issues

### General Fixes

Issue	Description
Alert Appears When Editing Student Field Value Function on Translated Fields	Editing translated fields using the Student Field Value function for a group of students results in an error. The fields can only be modified for one student at a time from their respective student page. This issue is now resolved.
DDE Table View of Teachers Table Produces Error	The DDE Table View of the Teachers table produces ORA-00904: "SCHOOLSTAFFDCID": invalid identifier error. This issue is now resolved.
Error Appears in Master Schedule When a Teacher Record is Removed from PowerSchool	An error message appears on the Master Schedule when a teacher record has been removed from PowerSchool. This issue is now resolved.
Incident Management - Action Change Code Within an Action Cannot be Edited	Incident Management will not update a change to the Action Change Code in an Action. It will accept the change, but after submitting the incident, when you go back to the same Action, the Action Change Code will not have updated. This issue is now resolved.
Installing PowerScheduler Engine Fails on MAC OS 10.9	Installation of the C++ PowerScheduler Engine fails on a Mac running Mavericks (OS X 10.9). This issue is now resolved.
Java NullPointerException Generated When Enabling Schoolnet Plugin	Enabling the Schoolnet plugin in PowerSchool generates a java.lang.NullPointerException error message in page headers and navigation bars. This issue is now resolved.
Month/Year and Calendar Days Incorrectly Displayed in Calendar Setup When Date Format is Set to yyyy/dd/MM	When the Date Format is set to yyyy/dd/MM on the Edit Locale page, the month and year are incorrectly displayed in the Calendar Setup when you click any of the links to view a specific month. In addition, the calendar days are also not available after making a selection. This issue is now resolved.
Multiple Webapps Unable to Start if The Server Does Not Have an Internet Connection	If a PowerSchool server does not have internet access when starting, several webapps will not start. This issue is now resolved.
Not All Sections Appear in Current	Teachers are unable to view some or all of their classes listed under Current Classes in PowerTeacher for the current Term even though classes have been assigned to them in

Issue	Description
Classes Listing in PowerTeacher	PowerSchool. The Classes are available in PowerTeacher Gradebook. This issue is now resolved.
PowerScheduler: HTTP Status 500 Error When Copying a Scenario	An HTTP Status 500 Error appears when you attempt to copy a scenario in PowerScheduler if more than 1000 sections were created in the ScheduleSections table. This issue is now resolved.
PowerSchool Not Starting Due to ActiveMQ Not Completing Initialization	PowerSchool startup on the Task Master node does not complete due to incomplete initialization of ActiveMQ. This issue is now resolved.
Replacement Character Rather Than Acute Accent Appears in Translated Header Text on Log Entries Page	Words with letters bearing acute accents incorrectly appear on the Log Entries page for the translated Header Text. Rather than displaying an acute accent, a replacement character appears. This issue is now resolved.
Reporting Engine Setup Error	Attempting to create a new query item or edit a existing one using the Reporting Engine setup results in a HTTP 500 error. This issue is now resolved.
SchoolStaff.Sched_Scheduled Containing Null Causes Java Error when Launching Visual Scheduler	An HTTP Status 500 Error appears when you click the Visual Scheduler link. This issue is now resolved.
Usage of Acute Accent Incorrectly Appears on Log Entries Page	Usage of the acute accent incorrectly appears on the Log Entries page. This issue is now resolved.

## State and Provincial Reporting

### Arizona State Reporting Updates

PowerSchool 8.1 includes Arizona state-specific updates. For more information, see Arizona state-specific release notes available on [PowerSource](#).

### State Reporting Platform

An enhancement initiates an automated process to clean up the out-of-date temporary tables that are created during report generation. The process runs upon ReportWorks service startup and daily at 2 a.m. (default setting). PSSR-75243

# Known Issues

The following new known issues were introduced with this release:

- Using the Search Attachments page with Internet Explorer 10, deleting a filter row that was just added causes some tags to appear on the page.  
**Workaround:** Reload the page or use a different browser.
- Using Internet Explorer 10, the Health screenings current selection is not retained and the selection reverts to the previously selected students.  
**Workaround:** The workaround is to use any browser other than Internet Explorer 10.
- When deleting or downloading documents that you do not have permission to download, an error message appears that covers the Add New Attachment button.  
**Workaround:** In order to add additional documents, reload the page.

# Page and File Changes

The following is a list of web\_root file changes. If you manage your own customized built-in PowerSchool files, review the list for new, updated, and deleted files. If you use an image server and there were changes in the web\_root/images or web\_root/scripts directories, be sure to update these directories on your image server.

**Note:** This list now includes all files that changed under web\_root. This change was made in response to requests from our customers.

**Key:**

- + = New page
- Δ = Changed page
- = Removed page
